

INNOVATION CELL 24-25

Teacher In-charge : AKSHAY SHINGARE
Student Secretary : RHUSHIKA R. SHIRODKAR

About Innovation Cell: Innovation cell is a forum where students from our college will be encouraged to develop new innovations and advance their knowledge. The main objective of the innovation cell is to let students explore, research, and use all the tools to uncover something new. The VISION of the Innovation cell is to prepare students to use their young minds productively and contribute towards developing our nation.

1. RE-BLOOM: Upcycled Eco-Pots

Date of the Event: Saturday, 27th July 2024

Time: 12:00 pm to 2:00pm

Location: S6 Classroom

Number of Participants: 38

Event Summary: On the occasion of World Nature’s Day, The Innovation Cell brings to you RE-BLOOM: Upcycled Eco-Pots in collaboration with The Nature’s Club. The activities included Upcycling items like PET Bottles in an innovative way along with the Auction sessions, educational presentations, exquisite ideas designed to engage the students and foster a sense of responsibility towards nature.

POSITION	NAME	YEAR
1st	Sariya Narayankar	SyBcom
Runner Up	Vipra Wavekar	FyBsc
Second Runner Up	Kunal Pardesi	SyBBA

2. Papercycle: Rewriting the Future

Duration of Event: 7 Days

Start Date: 1st October’ 2024

Location: Climbing Wall

Participants: Members of the forum “Innovation Cell”

As part of our Innovation Cell’s eco-conscious efforts, a team of 8-10 dedicated members came together to create something meaningful—turning waste into growth. We collected old notebooks that were no longer in use and embarked on the journey of recycling paper to craft fresh, sustainable sheets. Through a meticulous process, we transformed these discarded pages into handmade paper, embedding seeds within the sheets.

The idea behind Papercycle was simple yet impactful: Once the newly created books have served their purpose, instead of being discarded as waste, they can be planted into the soil—giving rise to new life in the form of plants. This initiative not only promotes the reduction of paper waste but also fosters environmental consciousness and sustainable practices.

Throughout the event, we experimented with various methods of paper recycling, ensuring durability while maintaining an eco-friendly composition. The excitement of witnessing waste being repurposed into functional books with a second life as a plant made the experience even more fulfilling. Through Papercycle: Rewriting the Future, we aimed to spread awareness about sustainable consumption, waste management, and the power of innovation in tackling environmental issues. This event was more than just a creative experiment—it was a step toward a greener, more responsible future.

3. Event Name: CRAFTING SMILES- Handmade For Children

Date: 22nd January' 25

Venue: Barhanpur

Description: We are excited to present “ Crafting Smiles: Handmade for Children”, a heartwarming CSR activity organized by the Forum Innovation Cell in collaboration with our generous sponsor, RUUH. This initiative aims to spread joy and empower the children of Barhanpur through a creative and meaningful contribution. The event will focus on handmade jewelry making, where members will learn the art of jewelry creation. RUUH, is graciously sponsoring and guiding us in the process, sharing their expertise to help us craft beautiful and unique bracelets. The jewelry created during this activity will be specially curated and donated to the children of Barhanpur, offering them not just a gift, but a symbol of care, love, and empowerment. The handmade jewelry will be distributed to children in Barhanpur who have limited access to such items, ensuring they feel valued and appreciated. This event not only serves as a means to provide these children with a thoughtful gift but also fosters a spirit of teamwork, creativity, and social responsibility among all participants. Together, we aim to spread joy, creativity, and kindness, leaving a lasting impact on the lives of these children.
